

Edward Caldwell's notes on each of the women who died.

- Ellinor Cooney of a weak nervous and irritable temperament liable to fainting and hysteria of careless habits she required constant attention to keep her berth dry and clean had an attack of Diarrhoea with low fever Died Sept 16th
- Mary Gilbride of a similar temperament liable to fainting and hysteria with Epilepsy supposed to be feigned before leaving her prison was seized with Diarrhoea had an old ulcer on her leg for which she was placed in the Hospital Died September 17
- Alice Fitzsimons had suffered from Diarrhoea before she left her prison In the early part of the Voyage she had an attack of fever from which she recovered having been one month in the Hospital from May 28th to the 1st of July She was discharged. Did apply again with Diarrhoea from which she ?????
- Catherine Manly had been in the infirmary of the penitentiary at Grange Gorman with chronic liver complaint. She was considered by Dr Harty the visiting Physician of that establishment, as an imposter and malingerer. When I saw her and examined her I thought her capable of undertaking the Voyage. She complained to me in July as the ship advanced towards the equator with pain in the right hypochondrium increased on pressure. Oedematous swelling of the lower extremities. I put her under Hospital treatment and under a mild course of Pil Hydrarg with Digitalis followed by???? Infusion of Gentian re???? from which she recovered applied again in August with Diarrhoea Dyspnea Ascetis and Anasarca. Died Aug 29th
- Susan Whittle had a very irregular life travelling about the country her health had materially improved in the penitentiary of Grange Gorman of very careless filthy habits required constant looking after She suffered much during the severe weather in the early part of the Voyage with loss of appetite repeated attacks of Diarrhoea ulcers on the legs
- Mary Healy had led the life of a vagrant in travelling her Country had suffered from Syphilis fever and Diarrhoea had been in the penitentiary of Grange Gorman, for many months. She made many attempts to destroy life. Had been liable to Diarrhoea and symptoms of incipient Pthisis I received her with the hope that the Voyage to the South would improve her She appeared to improve in health during the early part of the Voyage
