Nature of Disease	Case No.	Women's Names, Ages, Qualities, Time when and where taken ill, and how disposed of.	Surgeon David Thomson- replaced George Rowe The History, Symptoms, Treatment, and Daily Progress of the Disease or Hurt.
PA290824 Hæmorrhoids terminating in Abscess	#1	M.A. Williams Ætatis 25 November 25 at Scilly	States that she has been subject to Hemorrhoidal affections for some time past: Complains of very severe pain of back, and of anus and pudenda, intense headach with general febrile uneasiness. Pulse 120 [& hard?.& ribbed?] there is no discharge of blood from Hemorrhoidal vessels but integuments are red and tumid. <i>Capiat Ol: Ricini ℥i</i> <i>Foment: Calid. partibus affectus</i> Nov ^r . 26 th Very severe pain during the night of pudenda and Anus, parts are tumid and tender to the touch, considerable Dysuria <i>Venesectio ad ℥xvj Sanguinis</i> <i>Foment. & Cataplas. Calidum</i> Nov ^r . 27 th Bowels relieved by purgatives Pain and febrile symptoms continue, there is more tumefaction around the Anus shewing a tendency to Suppuration Cataplas. as before. Nov ^r . 28 th Tumefaction very considerable and extends on one side towards the Hip. Fluctuation being perceptible, an incision was made at the most prominent part and a very profuse discharge took place of dark coloured, very foetid matter, pain and febrile symptoms rather less – Pulse quick and small, appetite bad, restless at night. <i>Cataplas. ut antea</i> <i>Haust: ex Tinct: Opii gutt xxv h.s.</i> 29 Great discharge from abscess, tumefaction softer and less considerable, no appetite, bowels bound. <i>Cataplas. ut antea</i> <i>Capiat Infus: Sennæ ℥ifs cum Sulphate Magnes ℥ifs</i> 30 th Much foetid discharge from abscess, restless and slightly delirious during the night, much debility Pulse 92, little appetite bowels regular <i>Cataplas. parti.. Haust Anodyne</i> Wine and light diet
PA290825			

PA290826	December 1 st	Much discharge but otherwise better <i>Cataplasm et Altera Medicam^a</i>
	2 nd	Rather improves in general health & less tumefaction and discharge <i>Cont^r ut antea</i>
	3 rd	Much as yesterday, <i>Cont^r Med et alia</i>
	4 th	Much hardness surrounding the orifice of abscess, considerable dark coloured discharge very foetid rests ill and feels faint on attempting to sit up, appetite bad, pulse nearly natural. Wine and nourishing diet <i>Cataplasm ut antea</i>
	5 th	Much as yesterday
	6 th	Still considerable discharge, but less pain, rests ill, and takes very little food, occasionally vomits <i>Cataplasm ut antea. Sulph: Quinin gr ij 2 in die Vinum ut a.</i>
	December 7 th	Feels better and discharge and tumor less considerable <i>Medicam^a ut antea</i>
	8 th	Less discharge, still considerable hardness, has been sea sick & has vomited, pulse a little frequent, bad appetite, bowels bound <i>Capt. Bolus ex P. Jalap: & Calomel. Vespere si opus sit: Enema Communes</i>
	9 th	Much pain, vomited Bolus taken yesterday <i>Capiat Infus Sennæ cum Sulph. Magnes</i>
	10 th	Much as before, little affect from the purgative <i>Rept^r Infus Sennæ Cont^r Cataplasmm et alia</i>
	11 th	Less pain and hardness, still considerable discharge of dark coloured foetid matter (from abscess) with air, shewing communication with the Intestine. General health rather better. <i>Medicamenta et alia ut antea</i>
	12 th	Less pain and discharge and general health better
	22 nd	Has been improving since last report, tumefaction nearly disappearing and very little discharge. <i>Omitt^r Cataplasm Wine with diet of preserved Meats etc.</i>
	December 26 th	Return of pain in the situation of the former abscess near the Anus, no discharge for some time. <i>Cataplasm ut antea</i>
30 th	Much pain & circumscribed tumor have returned, general disorder of the System. <i>Cont^r Cataplasm: Capt Infus Sennæ cum Sulph Magnes</i>	
January 1 st	Return of discharge of matter from the orifice formerly made, hardness & pain rather diminished	
5 th	Less pain & discharge, complains of numbness of left thigh and diminished power of moving the extremity <i>Cataplasm tumori</i> Wine and diet as before	
11 th	Much the same since last report, rather more pain hardness moderate discharge general health bad with debility from inability to leave her bed Cataplasm & diet as before	
12 th	The hardness and moderate discharge of matter on examination with the probe a Sinus is found to extend towards the Hip for about 1 ½ inch but probe cannot be passed in the direction of the Gut, nor can any communication with it be detected. Sinus was laid oped thro' its whole length, dressing of <i>Ung^t Resinos</i> with Cataplasm applied Diet with wine as before <i>Sulph: Quininæ gr ij 2^{tis} in die</i>	
PA290827		

		<p>13th 19th 21st 28th 30th February 4th 14th</p>	<p>Still considerable pain. <i>Cataplasam u.a.</i> Much less pain hardness removed, sinus seems healing from bottom & less deep. General health better. <i>S. Quin: & Vinum Omitt^r Cataplasma: App^r. Ung^t Resinos</i> Little discharge or pain, wound appears healing. <i>Cont^r ut antea</i> Abscess almost healed and gives little uneasiness; complains of pain of Lumber Region; all along the thigh & Legs of that side deprived of sensation, with inability to move them; general health improved <i>Friccio Lumbis Sp^o Camphorate</i> More pain in the situation of the Loins but little discharge; paralysis of left thigh & Leg continues No discharge from Sinus or pain, more power of moving the left extremity and feeling partly returned, general health indifferent has been sick and vomited, probably occasioned by the rolling of the ship. <i>Pulv: Rhei ꝓfs Carb: Magnes g^r x frict. Lumb. Spirit^o Camphor.</i> Since last report Inflammation has attacked situation of former abscess, and purulent matter has been formed. Abscess has been opened by incision and offered relief. Paralysis affection of the left thigh and Leg continue. <i>Cataplasma app^r abscess</i> This woman continued on the Sick List until the arrival of the ship at her destination; Repeated suppuration took place in the neighbourhood of the Anus followed by Sinuses – These were laid open and made to heal from the bottom. Paralytic affection continued, notwithstanding the application of Blisters to the Loins She was received into the Colonial Hospital</p>
<p>PA290828 Pneumonia</p>	<p>2</p>	<p>Jemima Fuller Æ: 18 January 22nd Latitude 29°: 15 Sth Longt: 23 ° W 23rd 24th 25th January 26th</p>	<p>Complains of severe pain under the shoulder much dyspnoea, with a little cough. Pulse 96 strong skin hot, ill two days, ascribed complaint to cold, Bowels bound <i>Mitt^r. Sanguis ꝓ xvi</i> <i>Cap^t Sulp Magnesia ꝓj</i> Diluents and light food Much as yesterday, pain and dyspnoea continue Pulse 100, bowels regular – <i>Applict Emplast: Vesiat: pectori</i> <i>Cap^t: tertia horis Mixt: Diaphoretic ex Tinct: Antim: cum Nitrate potassæ ꝓi cum potu diluenti</i> Pain under the sternum, and dyspnoea not relieved – Pulse 100, skin warm, headach; pain increases towards night <i>Vespere Repatatur Venesectio et Mitt^r Sanguis ꝓ xvj</i> <i>Cont^r. Med. ut antea</i> Pain of chest and dyspnoea continue and the former rather extends to the left side: Pulse still quick & strong, less headach; <i>Emplast^r: Vesicator: Lateri Sinistr: Cont^r Mixt: Antimon. u.a.</i> Pain of chest from Sternum to left side and Dyspnoea continue unabated. Pulse 110 and strong, great thirst; no cough, bowels regular <i>Vespere Rept^r Venesectix (sic) ad ꝓ xij</i> Blood drawn exhibited a strong buffy coat. <i>Cap^t. Tinct: Digitalis gutt x 2^{nis} in die</i> <i>Mixt: Diaphoretic: Antimonial: u.a.</i></p>

PA2908929		27 th	Continues much the same, pain and dyspnoea great, can only lie on her back, respiration quick and performed with much divation (deviation) of the ribs. Pulse 112 hard & skin warm, Thirst, no appetite. <i>Venesectio ad ʒx</i> <i>Infus: Sennæ cum Sulph: Magnes:</i> <i>Medic^a alia ut antea si opus sit</i> <i>Enema commune vespere</i>
		28 th	Rather less pain of chest and dyspnoea Pulse 112 [lancing?] pain greater with more dyspnoea, blood drawn yesterday shewed firm crassamentum. <i>Emplast: Vesicator Lateri Sinistr: Med: u. antea</i>
		January 29 th	Much as yesterday, respiration continues difficult. Pulse 120 in the evening, morning less frequent. <i>Mixt: Diaphoretic: Antim: et Tinct: Digital gutt x 2^{is} in die</i>
		30 th	Nearly as before. Pulse 112. skin warm slightly moist still unable to make a full inspiration. <i>Med. ut antea.</i>
		31 st	Pain of left side and dyspnoea much the same. Pulse 110, strong & throbbing. Skin hot & dry, headach, thirst. <i>Venesectio ad ʒx</i> <i>Mixt: Antim: u.a. et Tinct Digital.</i>
		February 1 st	Pain of side & chest less severe Pulse 96 less dyspnoea. <i>Med. ut antea.</i>
		2 nd	Pain severe during the night, less so this morning Pulse 96, less febrile anxiety. <i>Medicamenta ut antea</i>
		4 th	Pain continues less, but she is still unable to lie easily in the recumbent posture. Pulse 94 <i>Cont^r. Med. u. a.</i>
		February 5 th .	Pain has continued to diminish since last report, is now chiefly confined to the left sides, general health improved. Pulse 84. <i>Cont^r. Tinct: Digitalis gtt viij 2^{is} in die</i>
			8 th
		9 th	Rather less pain and dyspnoea Pulse nearly natural. From this time the patient gradually but slowly recovered her general health and strength and was discharged from the Hospital quite cured.
Pneumonia Inflammation	3	Margaret Benson Ætatis 25 27 th Nov ^r 1834 In the Atlantic Ocean 5 December	Pain of the left side, dyspnoea, cough Pulse quick & hard – was treated by Bleeding, Blistering, Laxative and Antimonials Discharged cured.
Pneumonia	4	Amelia Richardson Ætatis 23 29 Nov at Sea 23 rd December	Severe pain of left side, dyspnoea, cough, quick pulse, was treated as the above patient, by bleeding, repeated blisters etc Discharged cured

PA290830 Pneumonia	5	Ann Phillips Ætatis 19 23 rd January At Sea 1 st February	Pain of side, dyspnoea, headach, slight cough. Pulse frequent- treated by Venesection, purgatives, blisters and Antimonial Diaphoretics. Discharged cured
[Pneumonia]	6	Sarah Edmonds Ætatis 20 28 th January At Sea 4 February	As the above patient: was twice Bled, took Laxatives, and Antimonial Diaphoretics. Discharged Cured
[Pneumonia]	7	Ann Gilby (Elizabeth?) Ætatis 25 21 st February 28 th February	Severe pain of chest, dyspnoea, cough slight expectoration, Pulse 112 strong Venesection, Blister – Laxatives, Expectorants Discharged Cured
[Pneumonia]	8	Elizabeth Mason Ætatis 22 24 February 3 rd March	Headach, pain under sternum, cough, Pulse strong and frequent, palpitation, Bleeding. Blister and Laxative given Left Hospital
[Pneumonia]	9	Ann Williams Ætatis 22 25 February 4 March	Pain of chest, dyspnoea, pulse frequent and strong, 94 in frequency Once Bled a Blister applied Antimonials Discharged Cured
[Pneumonia]	10	Mary Dafton (Doveton) Ætatis 28 19 March 23 rd March	Headach, general febrile uneasiness, foul tongue, skin hot, took purgative of Calomel & Jalap with relief, afterwards complained of pain of side, much Dyspnoea with quick pulse hot skin, was Bled and took Antimonial Diaphoretics with diluents etc Discharged Cured
PA290831 Leucorrhœa Peritoneal Inflammation	11	Caroline Barnett Ætatis 19 24 Nov' 1834 At Scilly	This young woman had been in the Sick List from the time she embarked on board the Ship and had been treated for a supposed Venereal affection. I found her at the period of my taking charge, labouring under what appeared to be internal Hæmorrhoids - & suffering great pain at the extremities of the Rectum but without sanguineous discharge. There as also copious discharge from the Vagina, of thin, fetid, discoloured matter – External parts tender and excoriated but no distinct ulceration could be detected. Mouth sore and gums swelled from Mercurial given – Pulse frequent, debility, appetite bad. <i>Omitt' pil: Hydrarg.</i> <i>Capt: Flor: Sulphur ℥ij</i> <i>Utat': Lotione Sulph Zinci partibus externis – fomentatur tumoribus [Hæmorrhæri c alibus]</i>

PA290832	29 th November	Light nutritious diet. Nearly as at last report. Mouth less sore, Complains of pain of abdomen. Bowels bound. <i>Infus Sennæ cum Sulph Magnesia</i>
	30 th	Chiefly complaining of pain of Haemorrhoids & discharge from Vagina. <i>Inject Solut Zinci Sulphatis</i>
	December 4 th	Complains of pain of right Hypochondrium felt especially when she turns herself. Pulse nearly natural. Bowels regular. <i>Applic^r Emplast. Vesicator Lateri</i>
	6 th	Less pain of side, less discharge from vagina <i>Cont^r u. a.</i>
	7 th	Pain now chiefly felt in the Epigastrium. Pulse nearly natural.
	8 th	Pain of Epigastrium continues and extends to the back, appetite bad – bowels regular <i>Capt. Pil: Hydrarg: 1 omni nocte mane Sulph Magnes ℥fs</i>
	9	As yesterday
	10	Haemorrhoid affection more troublesome less pain of Epigastric region <i>Capiat Ol. Ricini ℥fs</i>
	20 th	Has continued much the same since last report. Now complains of dull pain of right side, a little increased on pressure extending to the Epigastrium. Vomits everything taken into the stomach. Pulse a little quicker than natural <i>Appl: Emplast: Vesicator Hypochondris</i> <i>Capt. Hora somni pil. Hydrargy 1</i>
	21 st	Blister rose well & pain of side relieved, it is chiefly felt when vomiting comes on, which happens whenever food in the smallest quantity is taken into the stomach. Haemorrhoidal affection and discharge from Vagina give little uneasiness. Pulse 92. Bowels regular. <i>Capt. Haust: Salin Effervescenter pro re nata & pil. Hydrarg. 1 h.s.</i>
	22 nd	Continues to vomit after swallowing food or drink. Effervescing Draughts also rejected, also Burnt Brandy in teaspoonfuls – less uneasiness of side & Epigastrium. Pulse 94 <i>Hora somni Habt. Enema Anoydyn</i> <i>Tinct: Opii gutt xxx Deccoti Hordei ℥iv.</i>
	25 th	Has continued much the same, but can occasionally retain a little wine with Lime Juice. Slight uneasiness of side. Pulse 90. Bowels bound <i>Capt. Bolum ex Pulv. Jalap gr xij</i> <i>Calomel gr v</i>
	27 th	Still vomits occasionally, makes little other complaint. <i>Pil. Hydrarg h.s.</i>
	29 th	Less frequent sickness & vomiting, complains of return of pain from Haemorrhoids. Pulse nearly natural and countenance healthy. <i>Capt. Ol. Ricini ℥fs</i>
	31 st	Continued the same till this day, she complains of severe pain from Piles & of the abdomen generally. Pulse a little frequent. Bowels rather bound, has taken Purgative without effect. <i>Habt. Enema Aqua Tepidæ</i>
February 1 st	Still pain of abdomen. Several Injections of warm water exhibited with relief. Sickness and vomiting removed.	

PA290833		<p>6th</p> <p>7th</p> <p>January 9th</p> <p>10th</p> <p>11</p> <p>12</p> <p>13</p> <p>18</p> <p>20</p> <p>21st</p> <p>February 2nd</p>	<p>Still pain of Haemorrhoids & light discharged from Vagina.</p> <p>Still much pain from piles, vomiting has returned, pain of Epigastrium increased by pressure. Pulse a little frequent. Countenance nearly natural. Tongue clean. Bowels regular'</p> <p><i>Fric^t. Epigastm Ung^t Hydrag. ℥ss vespere</i></p> <p>Continues to vomit everything swallowed, pain of Epigastrium. Complains of pain of Hypogastric region extending to the back. Pulse 94, not emaciated, nor does she look ill. Bowels regular</p> <p><i>Cont^r fricto Epigastric Ung^t Hydrag.</i></p> <p>Still unable to retain on the stomach food or drink, pain of Epigast^m extending to back. Pulse 92. Tongue clean Bounds bound. Mouth slightly affected by Mercurials.</p> <p><i>Capt. pil. ij ex Calomel gr iv</i> <i>Ext. Colocynth gr vj</i></p> <p>Less sickness, no effect from purgative, two Enemata of warm water given with relief. Less pain of Epigast^m. Pulse 90.</p> <p>General pain over abdomen which is tense and tumid. Bowels bound. Pulse 92. Tongue clean & moist, more purulent discharge from Pudenda.</p> <p><i>Capt. Ol. Ricini ℥i</i> <i>Fomentatio abdomeni</i></p> <p>As yesterday. Abdomen tumid & painful, little effect from <i>Ol. Ricini</i></p> <p><i>Capiat Infus Sennæ c Sulph Magnes.</i></p> <p>Less pain of abdomen. Bowels open.</p> <p>Chiefly complains of Haemorrhoidal affection. No pain of abdomen or Epigast^m.</p> <p>Much pain of Rectum, discharge from Vagina with tenderness, no ulceration.</p> <p><i>Inject^r Sol. Oxymur. Hydrarg</i></p> <p>Pain of Epigastrium extending to back. Pulse nat. & general health improved</p> <p><i>Frictio Epigastric Ung^t Hydrargyri</i></p> <p>Continued to improve in health until this time that it was considered unnecessary to keep her longer in Hospital.</p>
PA290834			<p>She continued free of complaint except that her strength was not quite recovered until 27 Febr^y that she was attacked with the usual symptoms of Fever apparently arising from exposure to cold. When in a state of convalescence following this attack, she was suddenly seized with acute pain of abdomen, constant, increased by the least pressure. Sickness & vomiting. Pulse rapid & small. From her state of debility Bleeding could not be had recourse to. Fomentations, Blisters, and Laxatives Enemata were had recourse to without affording relief. The ship having in the mean time arrive at Hobart Town. She was sent to the Colonial Hospital – where she died the day following.</p> <p>Post Mortem examination discovered extensive peritoneal Inflammation proceeding from extravasation of the contents of the bowels into the general cavity of the Abdomen. A large ulcer was found in the Lymoid [Lymphoid?] flexure of the Colon, which had at length penetrated the bowel.</p>

Fever	12	<p>Caroline Watson Ætatis 16 8 January At Sea in the Atlantic Ocean</p>	<p>Complains of severe headach, feeling of sickness and inclination to vomit; sense of debility and general uneasiness with alternations of heat and cold, no appetite. Pulse 112, skin warm and dry Tongue foul, Bowels regr. Ascribes complaint to cold states that she has not been well for several days. <i>Capt. Tinct. Antim. gr i</i> <i>Mane Capiat Infus: Sennæ cum Sulph Magnesgr i</i> <i>Pulv. Ipec. gr viij pro Emetic</i> <i>Deluenta [Opia?] ad libitum</i></p> <p>9 Headach continues with general pain especially of extremities. Emetic operated. Tongue clean. Pulse 110 skin warm and dry, bowels open. <i>Capt. Pulv. Antim. gr ij</i> <i>Confect Aromat; gr iv 3^{is} in die</i></p> <p>10 Still complains of headach with febrile heat and uneasiness, pain of back and extremities. Pulse 96 bowels bound no appetite. <i>Capt. Pulv. Jalapa ʒi</i> <i>Super. Tart. Potass. ʒfs –</i> Frost water for drink. Sago for food</p> <p>January 11th Febrile symptoms continue. Pulse 96. Tongue a little furred. Bowels open, thirst moderate. <i>Cap'. Mist Antimonial diaphoretic ʒfs 3^{is} horis et potem delurentem</i></p> <p>12th Much as before headach, pain of back and extremities. Pulse 96. <i>Med^a ut antea</i> <i>Venesectio ad ʒx</i></p> <p>13th Febrile symptoms increased Pulse 126, headach – much febrile anxiety and general uneasiness. Thirst. No appetite. Tongue slightly furred, skin hot & dry. Bowels rather bound. <i>Capt. Statim Infus. Sennæ cum Sulph Magnes</i> <i>Tn' Antimon ut antea, potus Acidulatus</i> Face and upper parts of the body to be sprayed with cold water when preternaturally warm</p> <p>14th Very restless and moaned during the night, headach severe Pulse 110 skin rather cooler, vomited this morning. <i>Cap'. Haust. Effervescentum</i> <i>Cont' Med. et Ablutio frigida si opus sit.</i></p> <p>15th Febrile symptoms continue but all rather less urgent. Pulse 100. Tongue cleaner, less dry., bowels open. <i>Med u.a.</i></p> <p>16th Fever abated less headach & pulse 90. Tongue cleaner. <i>Cont' Medicamenta</i></p> <p>17th Nearly convalescent, appetite better <i>Omitt' Tn' Antimonial</i></p> <p>18th Convalescent. No complaint but debility. To have a little wine & nourishing diet. In about a week she was quite recovered and left the Hospital.</p>
PA290835			
Fever	13	<p>Mary Collett Ætatis 22 24 November at Scilly 6th December</p>	<p>At the time I joined the ship, found her affected with the usual symptoms of mild Inflammatory Fever. Bleeding was twice had recourse to with Laxatives and Antimonial Diaphoretics. Left the Hospital cured.</p>

Fever	14	Mary Pierce Ætatis 28 15 th December 12 January	Affected with Fever – Convalescent long, took <i>Sulph Quinine</i> with Wine and diet – attacked with symptoms of Dysentery Left Hospital cured
PA290836 Fever	15	John Miller Ætatis 10 14 th January at Sea son of a free woman 10 th February	Had suffered long and much from Sea Sickness. Was attacked with Fever of a mild Type with much debility, was treated as in the first cases. – In stage of convalescent which continued long. <i>Sulph Quinine in Infus Gentiane</i> administered with wine and fresh Diet Left the Hospital cured.
Fever	16	Maria Turner Ætatis 15 th February at Sea 27 th February	Was affected with the several symptoms of Continual Fever: succeeded by symptoms of Chronic Hepatitis, for the latter complaint small doses of mercurial were successfully administered. Left Hospital cured.
[Fever]	17	Margaret Brown Ætatis 22 11 th March 23 rd march	Fever as in the above patients. Bleeding an Antimonials with Laxative medicine and cool Regimen. Left Hospital cured
Parturitio	18	Margaret Hebbroon Ætatis 22 3 rd Decembber At Sea	In the 8 th month of pregnancy was seized with Labour pains this morning. After several hours of not severe suffering was delivered of a Male Infant, Stillborn, which appeared from discolouration and other marks, to have been dead for several days. Being of a very robust habit of body Milk Fever was rather severe & breasts troublesome. Several doses of Laxatives were given, she was kept quiet, and on low diet. In a short time she perfectly recovered her usual health.
Parturitio	19	Sarah Stevens Ætatis 23 rd December At Sea	Taken with labour pains yesterday afternoon, about 9P.M. was delivered of a Male Infant, strong & full grown. Afterpains rather severe. Anodyne Draught given. Locheal discharge as usual...Low diet & rest She recovered in the [usual?] time and without any unusual occurrences. Infant did well.
PA290837 Parturitio	20	Ann Robson Ætatis 22 28 December At Sea	Taken with labour pains last night, The afternoon was delivered of a female Infant, after an easy Labour. She recovered in the usual time, but being of a delicate habit of body, required more than common case of attention. Wine & nourishing diet etc allowed Infant did very well.

[Parturitio]	21	Mary Morgan Ætatis 36 4 January At Sea	At the full period of Pregnancy, is mother of 8 children, all of them on board the Ship. Last night taken in Labour & at midnight was delivered of a female Infant of the full size and strong & robust. She recovered without any unusual occurrences and her Infant did well.
[Parturitio]	22	Mary A. Gates Ætatis 24 19 March At Sea	Between the 7 & 8 month of Pregnancy. Last night after an easy Labour was delivered of a Dead Infant, which from discolouration appeared to have been dead for several days. She recovered very well in the usual time.
Dysenteria PA290838	23	M. White Ætatis 40 free woman December 7 th at Sea	<p>Has suffered much from almost constant Sea Sickness which has induced considerable debility. Complains of very frequent purging with much pain of Abdomen, which returns at intervals, with nausea want of appetite and severe of debility and faintness. Pulse quick, skin warm & moist, thirst. Complaints have continued for several days. Ascribes them to having taken cold. Tongue slightly whitish & clammy <i>Capt. Ol: Ricini ℥i</i> <i>Habeat Decoct: Hordei pro potu</i> Removed her into the Hospital & placed her in a cot. <i>Fomentation Calida Abdomeni</i></p> <p>8th Purging has been less frequent and pain of Abdomen less severe. Pulse 96, skin warm and dry, has been sick, & vomited. <i>Habt. Haust. Effervescent cum Tinct: Opii gutte viij</i> <i>Capiat. Pulv. Ipec: Compo gr vj 2^{tis} in die</i> "Evening" states that she has retched severely and vomited several times, and complains of very severe pain of the Hypogastrium. Bowels continue loose. <i>Capiat Ol: Ricini ℥fs</i> <i>Appf foment. Abdomini. Decoct. Hord. pro potu</i> A little Burnt Brandy to be given by Tea spoonfuls when sickness returns. <i>Omitt P. Ipec. Comp:</i></p> <p>9th Frequently purged during the night and pain of abdomen severe. Pulse 96, skin less warm and a little moist. Vomited during the night, apparently from the motion of the ship which has always affected her much. <i>Fomentatio ut antea</i> <i>Capt. Pulv. Antim gr ij</i> <i>Tinct: Op[ii] gutt v 3^{tis} in die</i> <i>Aqua Hordie ad libitum</i></p> <p>10th Purged several times during the night and vomited this morning. She complains of griping pain of abdomen. Pulse 96 <i>Capt. Ipec. Comp. gr v 3^{tis} in die</i></p> <p>11th Purging much less frequent and pain nearly removed. Pulse nearly natural. <i>Cont. Pulv. Ipec. Comp.</i> Light food and diluents as before.</p>

			12 th Bowels only a little loose, no other little complaint but debility. <i>Capt. h.s. Pulv. Ipec. Compo. gr vj</i> <i>Tinct. Opii gutt xij</i> 13 th Little complaint but debility <i>Capt. Sulph. Quininæ gr v</i> <i>Infus. Gentian. ℥vij 2^{is} in die</i> <i>Habt. Vini Rubri ℥vij in die</i> 19 th From this time she gradually, but slowly recovered her usual strength and health Left the Hospital cured
PA290839 Dyenteria	24	Elizabeth Roberts Ætatis 28 December 13	Was seized during the night with the usual symptoms of Dysentery. Gripping pain of Abdomen, frequent stools. Pulse quick. Tongue foul. Much febrile heat. An Emetic was administered, afterwards purgatives of <i>Pulv. Jalapa cum Sol. Murc. Hydrargyri</i> followed by doses of <i>P. Ipec Compo.</i> Diluents & light food. The patient strictly confined to bed & sufficiently covered with blankets with a view to excite and keep up the process of sweating. Symptoms were soon alleviated, and the strength restored, by the allowance of a little wine and suitable food. 21 st Left Hospital
Dyenteria	25	Mary Pierce Ætatis 28 December 15 at Sea January 15	After an attack of mild Fever as seized with Symptoms of Dysentery and was treated with purgatives and Diaphoretics. Convalescence was of long duration but she ultimately recovered with the aid of wine and fresh food etc Cured.
Dyenteria	26	Rebecca Hiscock Ætatis 30 January 7 th at Sea 12 16	The usual symptoms of Dysentery treated with Emetic, Purgatives, Diaphoretics, with tepid diluents. Convalescent No complaint – cured.
Dyenteria	27	S. Suffolk A free woman Ætatis 56 17 Jany at Sea 23 rd	Became affected with Dysentery and was treated as in the above cases. Long continued Debility followed requiring Wine, Tonics of S. Quininæ and nutritious Diet. Cured
PA290840 Dyenteria	28	M. Tilsed Ætatis 40 March 23 rd at Sea 28 th	Symptoms of Dysentery of considerable severity. Was treated as in the foregoing cases Left Hospital cured
[Dyenteria]	29	M. Donald Ætatis 28 March 23 rd At Sea	Dysentery treated as above Sent out of Hospital - 28

PA290842		<p>16th</p> <p>December 17</p> <p>18</p> <p>19</p> <p>20th</p> <p>21st</p> <p>22</p> <p>25</p> <p>26</p> <p>28</p> <p>29</p>	<p>women to be a very inattentive to his diet - & in every respect careless of him. <i>Capt. Pulv. Rhei gr iv Carb. Magnes gr iij M</i></p> <p>To have Rice water for drink, with a portion of Soup of preserved Meats. Sago etc for diet.</p> <p>Is stated to be worse than yesterday, vomits almost everything taken great thirst & bowels still loose. Emaciated pale & weak.</p> <p>Warm bath to be administered, friction & flannel Roller to abdomen. Sago & Rice water for drink.</p> <p><i>Capt. bis in die Calomel gr i</i> <i>Tinct. Opii gutt. ij</i></p> <p>Passed a better night, has vomited only once takes food and drink with avidity, less purged, abdomen tumid</p> <p><i>Capt. h.s. Calomel gr fs</i> <i>Mixt. Opii gutt. iij</i> <i>& frict^r Abdomen. Tinct^a Saponis et Opii.</i></p> <p>Rather better during the night & today less purged, vomited only one and takes sufficient food, but still weak and emaciated, less febrile heat and fretfulness.</p> <p><i>Capt. Calomel gr fs</i> <i>Tinct. Opii gutt fs 2^{is} in die</i> <i>Cont^r fricto Abdomenis Linimenta opiate</i></p> <p>Vomited once today but taken food in sufficient quantity. Bowels nearly natural, seems more lively.</p> <p><i>Med. ut antea</i></p> <p>Last night very fretful & vomited once today, only one stool, foetid & less fluid. Belly oft & he takes food readily and drinks much.</p> <p><i>Cont^r. Med. u.a.</i> diet as before.</p> <p>Fretful and restless during the night but seems better and stronger, one foetid stool – vomited once this morning, takes food freely and much drink, skin cool pulse nearly natural.</p> <p><i>Capt. Hor. Som. Calomel gr ifs</i></p> <p>Improves, little purging, does not vomit and takes food.</p> <p>Diet & a little wine.</p> <p>Has become more fretful, & seems more emaciated, bowels rather loose, stools very foetid & dark coloured, takes a little food & does not vomit.</p> <p><i>Capt. An unsigned set of notes – presumed to be referring to Surgeon George Rowe's illness.

St Mary's Scilly

I came here on December 5th/34 and found my father in a very debilitated state, with right leg and thigh, swelled to a great size, and œdematous, with Cough and expectorations, pulse irregular, urine thick, small in quantity, depositing Lithic acid, Costiveness, Thirst, skin tense and shining – (I cannot but here remark upon the kindness and attention shown by Mr Blewitt the Surgeon towards whom I shall ever feel a lively gratitude, and Mr Smith Resident Surgeon at Sandhurst, and son of the Governor of this Island attended in company with Mr Blewitt, with much assiduity and kindness). They ordered a pil 4 times daily composed of Hyd. Submur Gr ifs Pulv. Opii gr fs Pulv. Ipecac Gr fs Misc. This was on the 7th of the month. Cathactics of Pulv. Jalap comp - friction, Liniment of Ung. Hyd. Fort. Lini Sapon c a a ži – Imperial, Bandages, on the 16th the Symptoms began to decrease rapidly, the Gums being affected, and by the continuance of occasional purgatives of Pulv. Jalap c and the use of Imperial the swelling left entirely, and he began to regain his strength, and was able to shave, wash himself, sit up in another room, with slight assistance to walk about it – took tonic medicine composed of Cascarella Inf. – also two Glasses of Port Wine during the day, with light nourishment, continued increasing strength up to Christmas Eve – when he went to bed in good spirits, and to all appearance well.

On Christmas day after having washed, shaved as usual, was having his Breakfast when he complained of being Giddy, and in a moment as deprived of all power, with severe pain of Right Eye, and unable to see out of it, with partial paralis^s(sic) of Right Arm, Leg, foot, the sense of numbness very painful, violent Hiccough, irregular pulse, constant vomiting, skin cold and clammy – applied warm bottles, administered Sp. Ammon C. Mist. Camp.- also Ammoni Subcarbon: Cont^f. Camp: - Hyd: Submur Gr x – restless night.

Friday – vomiting still continues, numbness of the parts, pulse same. Hiccough still violent, prostration very great, continued the stimulating medicine, administered a [] Powder which stopt the vomiting, skin warm, applied a Blister to the Back of the neck – restless night.

Saturday applied eight Leeches to Temple which relieved the pain of the Eye – numbness still continues, Hiccough never ceases, Pulv: Jalap c – Salts and Senna – did not act, restless night in consequence of the Hiccough never ceasing.

Sunday, pain in the Eye quite gone, the other symptoms still continue, Hiccough worse, administered Sp. æther. Sulp. žfs doses every hour, Sp. æther nit – Sp Lavani C. equal parts, ži every hour, Pulv. Jalap c – did not act, an Enema (common) at night, which brought away some fæces, restless night in consequence of the Hiccough –

Monday prostration so very great that he passed his fæces in bed, Hiccough incessant night and day – pulse same, Tongue throughout white and covered with mucus, administered an Enema with žii of Terebinth – had a dark coloured motion.

Tuesday all the symptoms increased in violence, with pain in the region of the Bladder and difficulty in making water, had 6 or 7 dark coloured motions, fomentation to the Belly, the difficulty of making water increased, applied 10 leeches with fomentations which relieved the pain, and rather so the difficulty of making water – gave 90 drops of Laudanum which produced rather a quiet night, applied a Blister to the stomach for the Hiccough, applied cold water, diet cup of tea and ½ Biscuit – small cup of Broth, and one of Sago with table spoonful of Holland's by order of the Surgeons.

Wednesday Hiccough still the same the remedies failing, numbness still the same – difficulty in making water still continues and very small in quantity, tried to pass Catheter but found

some obstruction, pulse same as first – diet same, gave 120 drops of Laudanum provided a quiet night.

Thursday Jan^y 1st 1835 Hiccough very violent, applied liniment to the region of the Bladder. R. Opii c lini Sapon, water rather better, diet same with 3 spoonful's of Hollands – up to the present time not any fever. Gave 120 drops of Laudanum, without effect, at 3 in the morning gave 40 more, a little sleep, made a great quantity of water, Hiccough very distressing. Emp. Opii [tritriculas?] for Hiccough – R. Digitalis m x [?] same ½ 12 noon, again ½ 4 P.M. - again at 8 PM, same diet with the addition of a small pudding.

Friday fomentations continued with Liniment gave 40 drops of Laudanum without any effect.

Saturday ½ 12 night Haust Senna – Liniment applied at 2 in the morning 6 AM Haust Senna – quantity of urine small, Tongue same, at one PM had a motion healthy – and made voluntary at least 10 ounces of urine – another motion during the day – the urine flowing well and without pain or force – Hiccoughs rather better - - diet same –

Sunday, last night miserable. Tongue better, Hiccough increased in violence – fomentations continue – urine same as last, diet cup of tea 1 1/2 biscuit a little meat – Took Quinæ Gr ii in a draught .

Monday urine plentiful – Tongue clean, Hiccough better, pulse same, diet Tea, Soup – sago – 1 Glass of Port Wine – continue the Quinin – Good night without Laudanum.

Tuesday Tongue clean, Urine plentiful – Hiccough better – diet same with addition of part Breast of Turkey – Inf. Cascarella c Liq. Potassæ – Good

Wednesday – Tongue clean- urine plentiful – cont. Mixt. – Hiccough better – Bowels open – prostration still great. The paralysis continues – diet tea Biscuits, Broth, sago-

Thursday continue medicine – the Symptoms decreased very much in violence – diet tea Biscuits, Broth, Pudding – took two pills composed of 6 Grains of Ext. Colocs. with 3 Grains of Ext. Hyoscyamine – Restless night- continued Keen E and N.E. wind throughout –

Friday, at noon this day the wind changed to W.S.W. – Considerably better, Diet, soup, tea, Chicken, Bowels open once, took 50 drops of Laudanum at 9 P.M. rather a quiet night

Saturday – all the symptoms rapidly disappearing, but the prostration very great and the numbness as well as immobility of supporting himself on his right leg and not having control over his Right arm and hand still the same – Diet tea Biscuits – a little meat – Broth 1 glass Port Wine, continue the Quinin as before – 50 drops of Laudanum.

Sunday – much the same, prostration very great – rather a quiet night (took yesterday Evening two pills same as last). Diet tea, biscuits, broth, a motion this evening, 50 drops of Laudanum.

Monday - rather quiet night, continue Quinin, much the same, Diet tea, biscuit, broth, wine (took two pills same as last) night much the same, same dose of Laudanum

Tuesday continue better – Diet same – 60 drops of Laudanum – restless nights – continue Quin.
